

June 16, 1948.

Dear Barry,

At Yale, about a year ago, do you remember referring in your seminar to some work on phage-- it had to do with variation in fermentative characteristics of coli in relation to resistant 'mutants' ? Could you take the trouble to dig up that reference for me? I've never been able to find the paper.

How's everything going?

Best regards,

Sincerely yours,

Joshua
